I can't think of anything else right now. Last I heard from the Governor's office, we should know more in the next week or so about how they plan to proceed with the regulatory reform lists agencies provided. You looked at Pederson's milk language and OCA's meat labeling language—those were the only two “extras” we had been asked to look at I believe. If I learn of anything else, I will let you know.

If you get a chance to jot down your thoughts on talking points or explanations for our request bills, that would be very helpful.

According to the list you sent me, I have completed all drafts of language for legislation. Is there anything else I need to write? Should I provide any additional information on the items we asked the Governor to include in their bill?

?

Attached are suggested revisions to HB2008 and HB3806/SB1271.

I made the language in 2008 refer back to the Title 2 statements regarding ordinances. The beef and pork definitions are in a new section that should be added to HB3806/SB1271.

Please call with questions.
